Answer a Call

When the handset rings, the **bell** button will light up green.

Lift the handset to talk to your caller.

Press the **Enter** button to open the building door and replace the handset.The enter button will flash for a short period to indicate the door is unlocked.

Controls

Button	Description
Privacy GREEN	**Privacy button** When your phone is ringing pick up your handset to answer the caller. **If the phone is "off the hook" it will not ring.**
Privacy UNLIT	**Privacy button** (Normal state): Stays unlit when privacy is not enabled or there is no current call.
Privacy RED	**Privacy button** When the handset is not in use, press to enable privacy and you will not receive calls. Normal operation is resumed when you next press the button or the privacy time period has elapsed (default is six hours).
Enter UNLIT	**Enter button** (Normal state): This can only be used during a call and opens the door to allow visitors access to the building.
Enter RED	**Enter button** If the door is left open the key will remain constant red. You will need to close and lock the door.
